

DispenserONE® is a high-capacity dispenser of sanitizing chemicals, designed to be installed in large facilities, malls, airports, hospitals and anywhere with a large daily influx of people. Its high capacity vastly reduces refill frequency, helping to minimize maintenance costs and service interruptions

Product Features

- High tank capacity allows more than 25,000 doses of sanitizing gel on average, minimizing refill requirement, especially in places with a high influx of people. The unit comes with a 25-litre tank included in the package.
- Touch-free dispensing via proximity sensor guarantees maximum hygiene and safety.
- Peristaltic dosing with single shot fine adjustment ensures maximum dosage accuracy and repeatability.
- Single dose quantity can be adjusted via smartphone or PC for maximum flexibility according to the different chemical dispensed.
- Calibration can be performed via Wi-Fi to ensure dosing accuracy.
- Integrated level control gives direct and remote warnings to the owner, helping to prevent the device running dry.
- Wi-Fi access to the device via smartphone or tablet provides information on the total number of dispensed doses, the total dispensed chemical, the remaining chemical level and the general status of the unit.
- "Push" alarm messages can be sent via e-mail to the operator, alerting them to issues such as chemical level and tube degradation, allowing prompt maintenance intervention.
- An attractive and robust design, yet within a minimal footprint, makes DispenserONE® suitable for every site.
